DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 11 and 15, drawn to multi-layer material having a plurality of panels including a plurality of color diffractive patterns, classified in class 359, subclass 24.
 - II. Claims 7-10 and 12-14, drawn to printing and transferring method for forming a color image having holographic appearance, classified in class 347, subclass 171.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the thermal transfer process can be used to form color image of any design, either with or without holographic or diffraction effect, and the multi-layer material having a plurality of the panels including a plurality of diffractive patterns can be formed by direct interference method that utilizes a reference beam and an object beam.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. A telephone call was not made to applicant's attorney to request an oral election to the above restriction requirement, due the complication of the restriction requirement.

Art Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
